

Cheese head screw DIN 84

The use of the cylinder head screw DIN 84 is widespread for assembling various materials. Made of plastic, this screw effectively resists corrosion, weather, and UV rays, making it an excellent choice for electrical insulation. Thanks to its slotted head, the cylinder head screw DIN 84 is ideal for precise and secure assembly and tightening in environments subjected to high pressures and stresses. Available in natural nylon and PTFE, it complies with DIN 84 standards, ensuring optimal robustness and durability.
